Few careers offer more rewards, challenges and opportunities to help others than the field of nursing. As the demand for qualified nurses continues to grow, so do the educational needs of students who are looking for a timely way to enter the field.

The UT Health Science Center San Antonio has developed a program to help expedite achievement of the Bachelor of Science in Nursing (BSN) degree. The Accelerated Bachelor of Science Degree in Nursing (BSN) allows students to complete their education in 15-months and enter the profession in much less time than a traditional program.

Leverage your previous education. Accelerate your nursing degree.
The Bachelor of Science in Nursing (BSN) degree following an accelerated track is for students who hold a bachelor’s degree outside of nursing from an accredited college or university. The curriculum is designed to meet the needs of the adult student who has previously successfully managed upper division college education. Students complete four semesters and 60 semester hours of nursing credits at a faster pace as the program requires 15-months (four semesters) of full-time study.

Strong foundation to higher degrees and career advancement.
Choosing the right BSN program and school can impact your earning potential, job opportunities, chances for promotion, and general level of job responsibility. A BSN is also a requirement if you wish to pursue graduate programs in research, education, nursing practice, or administration.

A Bachelor of Science in Nursing (BSN) degree from The UT Health Science Center San Antonio will enable you to work in hospitals, surgical centers, public health agencies, community care agencies and clinics, nursing homes, research organizations, pharmaceutical firms, insurance companies, attorney’s offices, and schools – to name just a few.

At The UT Health Science Center San Antonio you will enjoy a top-rated BSN program. This program offers exceptional faculty and considerable resources of a major academic health center, enabling you to enjoy leadership training, clinical and community experiences, as well as opportunities for interdisciplinary research not afforded by many other nursing programs. Simply put: a BSN from The UT Health Science Center San Antonio is an outstanding platform from which to pursue graduate study or to advance your current career.
