As the health care system in America grows increasingly complex so do the demands placed on the nursing profession.

Few careers offer more rewards, challenges, and opportunities of lifetime learning along with the chance to help others than the field of nursing. Because of this, The UT Health Science Center San Antonio is equipped to offer comprehensive preparation for the health care field.

A meaningful job in a thriving profession.

With the highest demand for nurses among all occupations, there is no better time to enter the field than now. Nurses enjoy exceptional job security as well as flexible career opportunities in a thriving field. But as clinical knowledge grows and health care delivery becomes more complex, it is vital that you acquire the highest quality education possible to prepare for the responsibilities ahead.

A Bachelor of Science in Nursing (BSN) degree from The UT Health Science Center San Antonio will enable you to work in hospitals, surgical centers, public health agencies, community care agencies and clinics, nursing homes, research organizations, pharmaceutical firms, insurance companies, attorney’s offices, and schools – to name just a few.

BSN applicants are required to successfully complete 60 semester hours of pre-requisites of general education and science courses from any regionally accredited university or college prior to entering the BSN program. Applicants may apply once 51 semester hours of pre-requisites including all science and math courses, have been completed.

Strong foundation to higher degrees and career advancement.

By choosing the right BSN program, it can impact your potential career opportunities and level of job responsibility. It is also a requirement if you wish to pursue graduate programs in research, education, nursing practice, or administration.

At The UT Health Science Center San Antonio you will enjoy a top-rated BSN program. This program encompasses exceptional faculty members and considerable resources ranging from leadership training, clinical/community experience to opportunities for interdisciplinary research, which are not afforded by many other nursing programs.
